Activity Report of

IEEE Beijing Chapter in 2008

Chenyang Yang

IEEE ComSoc Beijing Chapter Chair

2008-10-13

IEEE Distinguished Lectures #1

Adaptive modulation assisted HSDPA-style cross-layer optimized MIMO-aided intelligent networking
10:20-12:20, May 23 2008

Prof. Lajos Hanzo, University of Southampton

More than 150 IEEE local Members as well as researchers and students from both universities and industries attended

IEEE Distinguished Lectures #2

Cross-layer design for collaborative wireless Ad-hoc networks
15:30-17:30 , May 23 2008

Prof. Andreas F. Molisch, Mitsubishi Electric Research Labs，MA，USA and Lund University, Sweden

More than 120 IEEE local Members as well as researchers and students from both universities and industries attended

IEEE Distinguished Lectures #3

MIMO mobile-to-mobile channel modeling, analysis, simulation and measurements

8:00-10:00, May 23 2008

Prof. Gordon L. Stüber, Georgia Institute of Technology

More than 80 IEEE local Members as well as researchers and students from both universities and industries attended

9:30-11:30, May 22, 2008, Prof. Prof. Geoffrey Li, Georgia Institute of Technology, More than 50 IEEE members and researchers

16:00-17:30 , May 16, 2008, Prof. John Thompson from University of Edinburgh, More than 40 IEEE members and researchers

18:00-21:00, May 22 2008

Organize ICC STUDENT NIGHET AT BUAA,

More than 50 Asia pacific students and more than 30 BUAA students attended

Future Plan in 2008:

Establish BUAA student branch

Organize 1 or 2 academic lectures for IEEE members

Organize 1 or 2 training lectures for IEEE student members
