## **"The History of the Internet and its Flexible Future"**

In his commemorative 1.5 hour address at IEEE GLOBECOM 2007 50th Anniversary, Leonard Kleinrock walks you through the history of the Internet. He vividly illustrates his early vision of the Internet and the vision for it in the future. His speech draws on his involvement with the Internet from its beginnings and from his developing the basic principles of packet switching, which underpins the Internet, to hosting the first Internet node in September 1969, and publishing the first paper and book on the subject...

A special video presentation from the 50th anniversary of IEEE GLOBECOM!

DVD Run Time: 1.5 hours in 6 part
