

IEEE ComSoc Launches Technology News, Serving the Community

As world's leading technical organization, [IEEE Communications Society](#) has an amazingly [powerful resource](#) for innovators, researchers and all the communication professionals to access the world of cutting-edge technologies.

IEEE ComSoc journals, magazines, and conferences publish thousands of papers every month. [IEEE Xplore](#), [IEEE Communications Society's Digital Library](#), have already included nearly 3 million articles and adds 200,000 new articles every year.

But here comes the challenge for most ComSoc professionals - The sheer quantity of new papers and articles published every month is overwhelming. Who has the time to read them all?

[ComSoc Technical News \(CTN\)](#) is here to help.

Initiated by [ComSoc Business Development Ad-hoc Committee](#) and inspired by [IEEE Technology News](#), [ComSoc Technology News](#) is an online publication that periodically provides the summaries of interesting, timely, and newsworthy papers and articles from ComSoc journals, magazines, and conference proceedings and other IEEE publications.

[CTN](#) is supported by volunteer [Editorial Board members](#), who are technical experts in diverse fields. The editorial team identifies papers and articles and work with authors to create summaries. Links are leading to full content in the IEEE Xplore, in comprehensive language that is accessible to non-specialists, including students, news media reporters, industry and government executives. Summaries are further reviewed and edited by a technical editor. CTN Editor-in-Chief performs the final review prior to publication.

[CTN](#) is free to all our members and to the ComSoc community, thanks to the support from our advertisers. CTN can also be viewed on mobile devices.

Enjoy the readings!
