

# IEEE Offers Open Access Publishing Options

Many authors in today's publishing environment want to make their research freely available to all reader communities.

To help authors gain maximum exposure for their groundbreaking research and application-oriented articles, IEEE will now be offering three options for open access (OA) publishing—Hybrid Journals, a Multidisciplinary Open Access Mega Journal, and fully Open Access Journals—all designed to meet the varying needs of our authors throughout their careers.

## What does IEEE Open Access mean to an author?

- Top quality publishing with established impact factors
- Increased exposure and recognition as a thought leader
- A consistent IEEE peer-review standard of excellence
- Unrestricted access for readers to discover your publications
- Great way to fulfill a requirement to publish open access

[Visit IEEE site for detailed information on Hybrid journals, Multidisciplinary open access mega journal, Fully open access journals, Review process, and Frequently asked questions -- www.ieee.org/open-access.](#)
