

# Join us for a Webinar on Synchronization in Next Generation Telecom Networks

As synchronization requirements have become increasingly complex for infrastructure and services including mobile backhaul, are you ready for the challenge?

Join us for a free live webinar - "**Synchronization in Next Generation Telecom Networks**" on **October 18, 2012** at 11:00 AM Eastern, 8:00 AM Pacific, 4:00 PM UK, 5:00 PM Western Europe.

This webinar examines the driving requirements for the new network and technologies under development by communications manufacturers and telecom operators for next generation networks. Our panelists Ravi Subrahmanyam, Vice Chair, IEEE TAOS Technical Committee, and Silvana Rodrigues, IEEE 1588 Committee Secretary, will walk you through challenges from both technical and business perspectives followed by a live Q&A discussion.

Topics include:

- Synchronization, why it matters in telecom networks?
- Overview of key technologies including synchronous Ethernet and IEEE 1588
- ? • Synchronization from a carrier's perspective

The Webinar will be moderated by Michael Mayer from Ciena, ITU-T Technical Editor, Packet Timing & Synchronization.
