

# They did it again! This time - ComSoc Android App

## POSTECH Students Develop Android App for ComSoc

Prof. James Won-Ki Hong and his students Yoonseon Han and Yeongrak Choi from Pohang University of Science and Technology ([POSTECH](#)), Korea developed and provided an Android application for ComSoc members and non-members with an Android-based smart device such as the Samsung Galaxy S and Galaxy Tab.

The [ComSoc App](#) for Android devices was developed as part of a term project for a graduate course called, "Smartphonomics: Convergence using Smart Phones and Devices" in the Division of IT Convergence Engineering (<http://itce.postech.ac.kr>), [POSTECH](#), Korea.

[The App can be downloaded](#) from the Android Market by searching for the keyword "ComSoc" for free. It should also work for other Android phones.

This is after they developed and released the same [ComSoc App for iPhone user](#) earlier this year. You can [visit the iTunes for more info on the iPhone ComSoc App](#).

So what's next coming out of their sleeves? Here's the clue - the team has revealed to ComSoc volunteers and staff that they planned to develop an app for [IEEE Technology News](#).
