(Sean Moore)

The online version of *IEEE Communications Magazine* draws upon the content of the magazine. The site is accessible to the general public. However, technical content is accessible only to IEEE Communications Society members. This award-winning magazine brings you the latest international coverage of current issues and advances in key areas of wireless, optical and wired communications. Written in tutorial applications-driven style by the industry's leading experts, *IEEE Communications Magazine* delivers practical, current information on hot topics, implementations, and best industry practices.

Considered by many to be their most important member benefit, monthly articles feature in-depth descriptions of technologies, systems, services, market trends, development methods, regulatory and policy issues, and significant global events. These articles are complemented by a variety of departments, including: The Presidents Page, Conference Calendar, Book Reviews, the Global Communications Newsletter, Society News, History of Communications, Certification Corner, and more. This monthly magazine becomes your single most important source of state-of-the-science communications information.
