

IEEE Transactions on Communications Home

Editor-in-Chief
eic-tcom [at]
LNT [dot] de
(Robert
Schober)

Regarded as "the source" for breakthrough communications theories and practical applications, this world-renowned, focuses on all telecommunications including telephone, telegraphy, facsimile, and point-to-point television, by electromagnetic propagation including radio; wire; aerial; underground, coaxial, and submarine cables; waveguides, communication satellites, and lasers; in marine, aeronautical, space and fixed station services; repeaters, radio relaying, signal storage, and regeneration; telecommunication error detection and correction; multiplexing and carrier techniques; communication switching systems; data communications; and communication theory.

For those interested in volunteering to be on the *IEEE Transaction on Communications* Editorial Board, please [click here](#).

Including:

- Modulation & Signal Design
- Wireless Communication
- Optical Communication
- Speech, Image, Video & Signal Processing
- Transmission Systems
- Network Architecture
- Coding & Communication Theory
